

Funding Statement

OligoVigil submission to Nucleic Acids Research, Database Issue

2026-06-07

Funding Statement

This work received no external funding. The computational results reported in this manuscript were obtained on institutional research-computing facilities at Southeast University, Nanjing Medical University and the University of Innsbruck. We thank the operators of these sites for the compute allocations that made this study possible.

Role of the funder(s): Not applicable (no external funder). The institutional compute providers above had no role in study design, data collection and analysis, decision to publish, or preparation of the manuscript.

Statement aligned with the team's Octo-Agent / ESWA 2026-06-07 submission (same author group). [TBD: Yun Liu (Funding Acquisition lead) and Jie Ni to confirm before submission whether any named grant (e.g. NSFC, FWF, Horizon Europe MSCA) supported the OligoVigil work specifically and should be acknowledged in addition to the "no external funding" baseline. Do not autofill — fabricated grant numbers are research misconduct.]
