

OligoVigil evidence landscape

A source-anchored map of molecule classes, safety/off-target mechanisms, literature grounding and benchmark reuse

A

Evidence flow from molecule class to reusable records

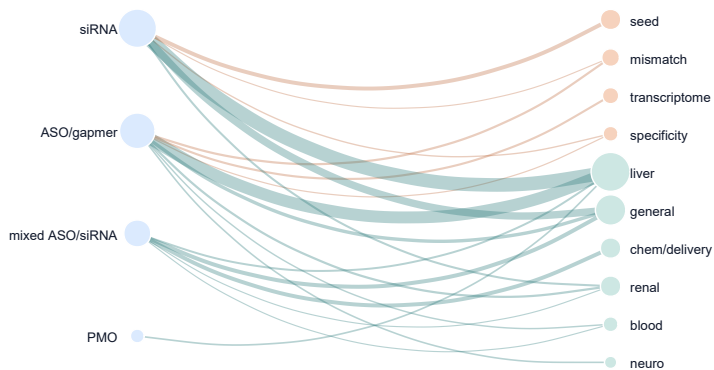

Each ribbon is a curator-verified release stratum; width is row count

B

Mechanism and endpoint connectivity

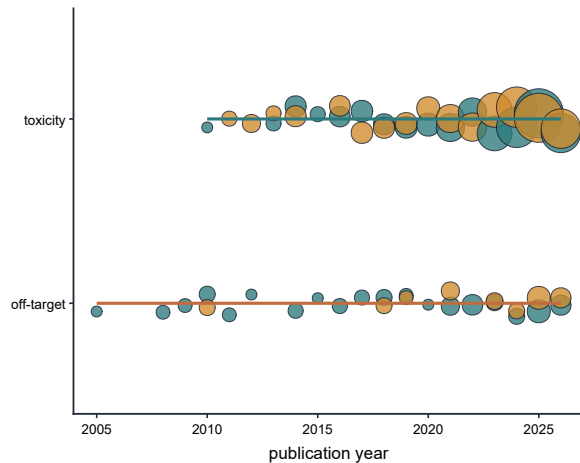

Edges connect molecule classes to safety or off-target evidence families

C

Source-year landscape

Bubble area is distinct source count; fill shows grounding depth

D

Reusable evidence state

Four orthogonal release states; labels show counts
