

## Release validation and residual curation gaps

Completeness, machine-stage false accepts, independent curation, and benchmark readiness

**A**

### Core-field completeness

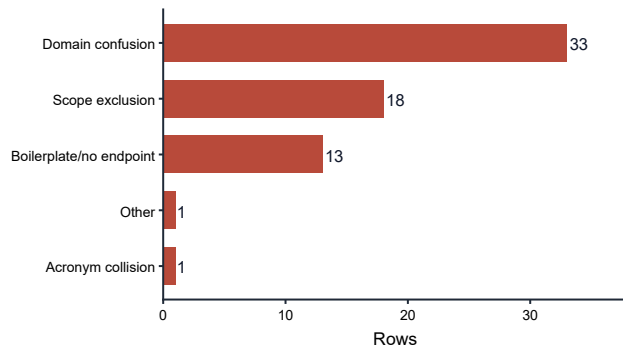

Complete provenance; sparse sequence/dose fields

**B**

### Machine-stage failure modes

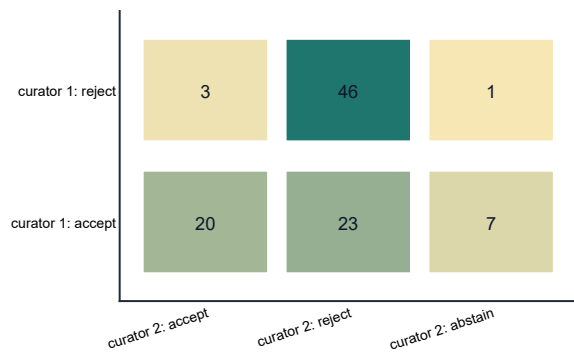

66 false accepts among 90 v1 accept calls

**C**

### Independent curation check

KAPPA-2: kappa = 0.42; sensitivity kappa = 0.34

**D**

### Benchmark and metadata readiness

Reference splits plus residual worklist
