

OligoVigil: a curator-verified, source-anchored knowledge base of oligonucleotide safety

Six-stage curation pipeline | 658 records | 344-item leakage-aware benchmark | agent-readable

Curation pipeline

Inside the 658-record release

What makes it different

- Curator-verified
- Source-anchored
- Leakage-aware benchmark (n = 344)
- No-login web portal
- Agent-readable: OpenAPI + MCP + Bioschemas +

The LLM never writes a curator decision.
Human-only writes on curator_verified.
